

THE CLAM™ TOILET FLANGE REPAIR RING

The Best Damn Toilet Flange in America.

Patented two-piece 409 stainless steel repair ring — repairs a rusted closet flange in place, no floor demolition. Part # CLM-001

PRODUCT

When a closet flange ring rusts out, the traditional fix is cutting out the whole assembly — slow, expensive, and hard on the floor. The Clam replaces just the ring: two 409 stainless steel halves fit around the existing pipe, lock under the lip of most PVC and ABS flanges, and screw down solid. The repair that used to take all day takes about an hour.

SPECIFICATIONS

Case Pack	50-count case (30-count also available)
Freight	Full Freight Allowed on qualifying orders
Rating	4.5 / 5 across 269 Amazon ratings

WHY STOCK IT

- ✓ **One SKU, constant demand** — rusted flange rings are among the most common toilet service calls in the country.
- ✓ **Saves plumbers hours** — one visit, no cutting pipe, no breaking floors.
- ✓ **The Made-in-USA story sells** — patented, family-made in Erie, PA. It moves at the counter.
- ✓ **No import exposure** — domestic manufacturing, stable supply and pricing.

INSTALLATION — FIVE STEPS, ONE VISIT

1

Pull the toilet

Shut water off, flush, remove the bowl.

2

Remove old ring

Cut away the rusted ring with a cutoff wheel.

3

Set The Clam

Lock the halves in the groove; screw down.

4

Place wax ring

Standard wax ring, just like any flange.

5

Reset the toilet

Bolt down — stronger than the original.
